

List of harmful, burdensome and dangerous factors for health called 'harmful factors'

1. In the field of agricultural sciences in a scientific discipline:

- a. forestry
- b. agriculture and horticulture
- c. nutrition and food technology
- d. animal science and fisheries

- 1) noise,
- 2) vibration,
- 3) UV radiation,
- 4) hot and cold microclimate,
- 5) organic and inorganic acids,
- 6) organic solvents,
- 7) *Borrelia burgdorferi* (the spirochete that causes Lyme disease),
- 8) *Staphylococcus aureus*,
- 9) *Clostridium tetani* (tetanus),
- 10) *Aspergillus fumigatus* (*aspergillus fumigatus*),
- 11) flaviviridae (tick-borne encephalitis virus),
- 12) rabies virus,
- 13) display screen monitor (computer).

2. In the field of engineering and technical sciences in the scientific discipline:

- a. civil engineering, geodesy and transport
- b. mechanical engineering
- c. environmental engineering, mining and energy

- 1) noise,
- 2) vibration,
- 3) UV radiation,
- 4) display screen monitor (computer),
- 5) *Borrelia burgdorferi* (the spirochete that causes Lyme disease),
- 6) flaviviridae (tick-borne encephalitis virus).

3. In the field of social sciences in the scientific discipline of economics and finance

- 1) display screen monitor (computer)

4. In the field of veterinary science

- 1) *Borrelia burgdorferi* (the spirochete that causes Lyme disease),
- 2) *Clostridium tetani* (tetanus),
- 3) salmonella,
- 4) pathogenic microorganisms, including viruses, bacteria, fungi, parasites - contact with blood, body fluids of animals, etc.
- 5) flaviviridae (tick-borne encephalitis virus),
- 6) rabies virus,
- 7) toxoplasmosis (*Toxoplasma gondii*),
- 8) leptospira - a type of gram-negative bacteria, belonging to the type of spirochetes
- 9) aspergillosis
- 10) screen monitor (computer).
